THE FORTY-SECOND ANNUAL REPORT.

THE wonderful record of increased usefulness of the Nottingham and Notts. Throat, Ear, and Nose 'Hospital, shown each year since it was established in 1887 by the late Dr. Donald Stewart, has been maintained, during 1928.

In view of the recent extensions, and building of a new Out-Patients department, it may be interesting to note that the founders originally provided an Out-Patient department only, where during the first year 515 poor persons received treatment, but the need for an In-Patients' department was soon acutely felt, and this was inaugurated with 8 beds in 1902.

In 1925 the accommodation of the whole Hospital was found to be altogether inadequate, and the Governors bought 63, Goldsmith Street, for £1,800, providing 13 Beds and an Out-Patient department under the same roof.

Owing to the large increase of work, three years later it was found necessary to enlarge, and at the same time, re-organise the Hospital, and at the last Annual Meeting the Governors submitted a proposal to build a thoroughly up-to-date Out-Patient department on the vacant land facing Goldsmith Street, which proposal was received with favour.

This work has now been completed and provides commodious and comfortable waiting rooms, with necessary retiring rooms, large airy and hygienic consulting rooms, dark room, all fitted with the latest electrical appliances for diagnosis and treatment.

This removal of the Out-Patient department will enable us to add an additional ward to the In-Patient department, and provide for a further 5 beds, the necessity for which is shown by the fact that at the present time there are between 200 and 300 patients waiting for admission.

The expense and complications of modern methods and their dependence on skilled nursing, makes it almost impossible to perform operations in a private house. Nursing Homes are not a completely satisfactory solution as they have not the resources of a Hospital, and the expense is beyond the capacity of the greater number of householders.

In view of this the Board propose to have a certain number of beds for paying patients.

It will be noted from the statistics shown on another page, that the record number of 716 operations were performed under complete anæsthesia in addition to a large number under local anæsthesia, and that 7310 attendances were made during the year.

Although the response to our appeal for funds has been a generous one, the financial statement shows that we are still in debt to the extent of £2,000, which the Board are anxious to liquidate at the earliest moment.

The genial and homely atmosphere of the Hospital has been maintained; this is due to the sympathy, attention and efficient services of the Honorary Surgeons, and the Matron and her Staff, to whom the Board tender their sincere thanks.

While thanking all the members of the Board for their services during the past year, I do feel that our thanks are especially due to Mr. T. C. Howitt, A.R.I.B.A., Mr. Robt. A. Page, F.C.A., and Mr. A. G. Dickins, Solicitor, for the valuable professional services they have given voluntarily.

ARTHUR B. GIBSON,
President.

MEDICAL OFFICERS' REPORT.

During the year 1928 the Hospital was open for the treatment of out-patients on 144 days. The number of new patients attending was 2095.

The total number of attendances was 7310; the average number of attendances of each patient was 3.5; and the average number of attendances each day was 51.

There were 716 operations on In-patients during the year under full anæsthesia.

The figures below show the amount of work done from year to year by the Institution since its formation in 1887.
